| Concrete required | |
| No surface fixation available | |

Materials

Metal poles of 127 mm
Metal tubes of 60 mm
Polyester-coated metal parts
Aluminium and plastic clamps
Plastic pole caps
HDPE polyethylene sheet material

Product Description

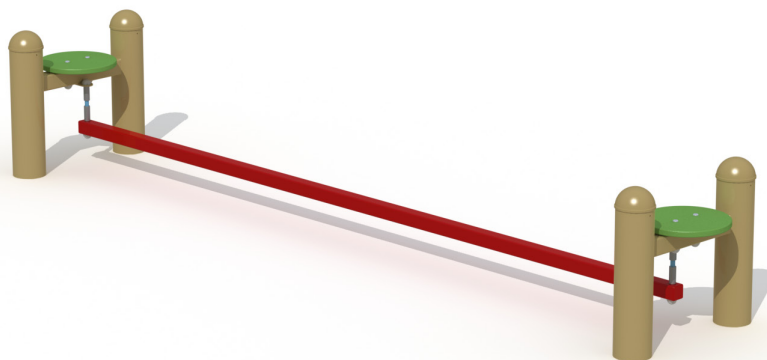

Metal playground equipment for children aged 6 to 12. This playground equipment is the modern version of the balance beam. It has 4 low (0,6 m) vertical metal poles (installed in a rectangular) between which a red metal tube is placed. The purpose is to go from one side of the playground equipment to the other by crossing the red tube without touching the soil. There is no rope which the children can hold. Hence, this is a real balance exercise. All metal parts are treated against rust and polyester coated. All nuts and bolts are completely covered by flower-shaped plastic protection caps.
