No surface fixation available

Materials

Round wooden poles 12 cm thick
Plastic tyres
Ropes in 16 mm polypropylene rope with steel-wire reinforcement
Galvanized chains
Round wooden poles in oak for in the ground
Round wooden poles in larch for above the ground

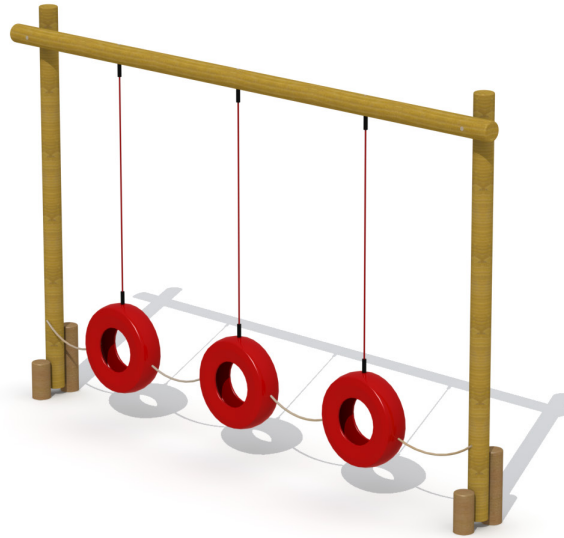

Product Description

Adventurous playground equipment for children aged 4 to 15. The playground equipment is made out of 2 vertical roundwooden larch poles (diameter 12 cm) which are connected with each other by a horizontal roundwooden larch pole (diameter 12 cm). The vertical poles are each supported by 2 smaller oak poles with the same diameter. 3 plastic tyres are hanging on the horizontal pole. These tyres are connected to each other by galvanized chains. The purpose is to go from one side to the other by using the tyres and by not touching the ground. All nuts and bolts are completely covered by plastic protection caps. The oak poles are fixed directly into the ground by using concrete.
