Product Information

Product type	Universe
Certification	EN-1176
Dimensions	7,2 x 3,9 x 3,3 m (length x width x height)

Materials

Metal poles of 127 mm
 Metal tubes 27,34 and 48 mm
 Metal parts polyester coated
 Aluminium and plastic clamps
 Plastic pole and protection caps
 Sheet material and climbing grips in HDPE polyethylene
 Ropes and nets in 16 mm polypropylene rope with steel-wire reinforcement
 Maintenance-free turning mechanisms

Technical Information

Maximum fall height	2,62 m
Security zone	61 m ²
Number of children	20
Concrete required	
No surface fixation available	

Product Description

Challenging modern playground equipment for children aged 6 to 15. It is built out of 2 vertical poles, connected to each other by means of a bended hanging ladder. 3 large climbing elements are attached onto the highest pole by means of aluminium clamps. Via a bended snake climber, one can climb to the top of the pathfinder. A bended net, placed between the central climbing pole and a bended tube, allows children to climb at the same time, at different heights. The net is built out of 16 mm polypropylene rope with steel-wire reinforcement. The Pathfinder can also be climbed via a bended climbing wall with a HDPE polyethylene panel with several crawling and climbing possibilities. This climbing wall has plastic climbing grips at both sides. A vertical, rectangular climbing net allows to climb the lowest pole. At this side of the Pathfinder, there is also a rotating shuttle. All metal parts are protected against rust and polyester coated. All nuts and bolts are completely protected. This playground equipment is fixed directly into the ground by using concrete.
