### Product Information

Product type Sand playground equipment  
 Certification EN-1176  
 Dimensions 1,6 x 0,3 x 0,6 m  
 (length x width x height)

### Technical Information

Maximum fall height 0,55 m  
 Security zone 16 m<sup>2</sup>  
 Number of children 8  
 Concrete required  
 No surface fixation available

### Materials

Type of wood: padauk 120 x 57 mm and 42 x 35 mm  
 Metal tube  
 HDPE polyethylene sheet material and disks  
 Flower-shaped protection caps

## Product Description

Life size scale for children aged 2 to 6. The playground equipment consists of a vertical construction made of larch. On this vertical construction is a horizontal beam attached. This beam can balance to the left or the right depending on the weight that's put on one of both sides. On the left side of the horizontal beam you can find a green plastic bowl. The children can use this bowl to store stones, sand or other materials. At the other side of the beam you can find a movable grey tube. Sand or other materials can slip through this tube. This playground equipment gives children a chance to gain insight in the weight of certain materials. In the middle of the horizontal beam you can find a colorful abacus with sliding plastic discs.
