

NOVUM

7002EPO

Description

An interesting form of a small island created for children aged 0-3 will certainly encourage children to play. In the front panel, holes different in shape and size have been drilled to which colored plexiglass pieces have been applied. Watching the surroundings through them, children will be surprised how different the world looks. Climbing and descending from the island is practicing balance, coordination of movements and strength of hands. Fun develops the motor skills of children, stimulates their curiosity, teaches independence in overcoming various barriers.
